

## TRADE CONDITION IS FULL OF HOPE

### SATISFACTORY PROGRESS IS MADE THE PAST WEEK.

Pronounced Gains Shown—Feeling of Confidence That General Trade Is Sure To Improve in the Early Autumn—The Upward Tendency of Prices

"General trade shows the most pronounced gains this week at Chicago, St. Louis and Galveston. The feeling of confidence that general business is to improve in the early autumn is marked at these cities, and purchases of dry goods, clothing, shoes and other staples have increased heavily and are followed by a disposition to move prices up. Purchases were restricted at Kansas City, Omaha and some other northwestern points early in the week, owing to extreme heat and fears of damage to the corn crop, but rains and cooler weather have stimulated demand again. On the Pacific coast business is brisk, the feature in California being heavy wheat shipments to San Francisco, at Portland large exports of lumber and at Seattle and Tacoma active demand for supplies for Alaska and the northwest territory and for wheat, fruit and hops. The movement of general merchandise throughout the country is unquestionably larger than last week. Cotton goods and woolen industries are better off and the stagnation in iron and steel has given way to a growing inquiry and increasing output. But more significant still is the extraordinary expansion in bank clearings this week and last month.

"The upward tendency of prices during the last three weeks is again a feature, wool being firmer and higher for some varieties. Cotton yarns are stronger also, as are some grades of cotton at the west. Shoes are no higher, but leather and hides cost more than a week ago, as do wheat (notwithstanding the reaction in September options), wheat flour, pork, lard, Pacific coast hops, sugar, soft coal and tea. There is a 25-cent advance in Bessemer pigiron at Pittsburg, where makers decline orders for future delivery at current quotations, and for iron bars and iron and steel sheets at western centers. In fact, our prediction in iron and steel has appeared. "Exports of wheat (four included as wheat) from both coasts of the United States and from Montreal this week show a sharp increase, amounting to 3,308,477 bushels, compared with 2,343,000 bushels last week. Exports of Indian corn this week amount to 3,223,885 bushels, compared with 1,482,000 bushels last week.

"Failures for the week have been 237 in the United States, against 240 last year, and 29 in Canada, against 32 last year."

### FAST TIME BY GARDINER.

Chicagoan Shows Great Speed at Meet of the L. A. W.

Philadelphia, Pa., Aug. 7.—The opening race meet of the eighteenth annual meet of the League of American Wheelmen was held Friday at Willow Grove park, fourteen miles from this city, before 15,000 spectators. It was the most successful in the history of the organization in attendance, enthusiasm and good racing.

Several state records were smashed and Arthur Gardiner, the Chicago crack, came within two-fifths of a second of breaking Hamilton's world record for one mile paced. He succeeded in lowering the fast mile made by "Johnny" Johnson at Chicago last year by four-fifths of a second. He made the mile in 1:39 3-5, breaking the state record of 1:45 3-5, held by Earl Kiser.

Starbuck also took a trial at the record, paced by a quad and a triplet for the first half. He made very fast time, but lost the triplet. His time was 1:44 3-5, also breaking Kiser's record.

Both these events followed the scheduled races for the day. In the latter the honors among the professionals were won by F. J. Loughhead, of Sarnia, Ont., who crossed the tape a winner in three trials, two fairs and second man in a third final. In one of these finals, the one-mile professional, he broke the state competition record of 2:04 4-5, by covering the distance in 2:03 3-5. He captured the one-quarter-mile championship in 0.32.

Among the amateurs honors were more evenly divided, with the best racing done by Peabody, Johnson, Middendorf, Schade, Krick and Miller.

### Gov. Mount Will Investigate.

Indianapolis, Ind., Aug. 7.—Governor Mount has announced that he will investigate the report that the new board of trustees for the southern hospital for the insane is discharging old and incompetent employees to make places for republican politicians. He reiterated the statement that so long as he is governor politics must be kept out of the public institutions.

### Leaves Greece Defenseless.

London, Aug. 7.—The Athens correspondent of the Daily Telegraph asserts that the frontier line upon which the powers have agreed places Greece completely at the mercy of the Turks.

### "Tim" Hurst Released on Bonds.

St. Louis, Mo., Aug. 7.—"Tim" Hurst, the league umpire who was arrested for assaulting a Cincinnati with a beer glass, was released Friday in bonds of \$500.

## THE BASEBALL REPORT.

Standing of the Clubs in the Various Leagues.

Chicago improved its position slightly yesterday. Victory from Tebeau's tribe was fairly easy, although the lead in runs was not great. St. Louis, which just now is playing as if it were worth while, fought Pittsburg for fourteen innings, but lost. Philadelphia lost ground, and is but two games in advance of the Colts. Boston and Baltimore had a fierce struggle. The champions got what appeared a safe lead, but Boston came strong in the last innings and won. Standing of the clubs:

Patchen in 2:01 1-2. Columbus, Ohio, Aug. 7.—Friday was replete with surprises at the Columbus Driving park, there being a reversal of the order of the previous day when favorites won in a majority of the events. The greatest surprise was the free-for-all pace. There were four starters, Joe Patchen, Star Pointer, Lottie Lorrain, and Badge. The much-lauded conqueror of John R. Gentry was vanquished by the great son of Patchen Wilkes in one of the most exciting races ever witnessed. Patchen not only won the race on its merits, but paced the fastest mile ever made in the grand circuit, equaling the world's record of 2:01 1-2, made by John R. Gentry at Glens Falls.

### Senator Teller Has No Hope.

Chicago, Aug. 7.—Senator Teller was in this city yesterday and expressed his opinions of the fall in the price of silver. He said: "I have no confidence in the administration accomplishing anything in its attempt to establish international bimetalism. What my colleague, Senator Wolcott, and his co-laborers on the monetary commission will bring about, will not benefit the silver cause directly. It will probably bring the matter more prominently before the European nations, and of course that will help. France and Germany may agree to it, provided Great Britain will join, but that country will not."

### Damages for Ohio Lynching.

Columbus, Ohio, Aug. 7.—Wilbur E. King, a colored citizen of Columbus, who has been engaged in taking depositions to be used in the case brought by Attorney-General Monnett against Champaign county to recover damages on account of the lynching of "Click" Mitchell, has filed his report, and suit was begun in the Supreme court Friday afternoon. The proceedings are under what is known as the Smith anti-lynching law. It provides that the relatives of the person lynched may sue to recover from the county an amount in damages not exceeding \$10,000.

### Colonel Sexton for Commander.

Chicago, Aug. 7.—It is expected that the twenty-seven Illinois delegates to the convention of the G. A. R. in Buffalo, which meets Aug. 25, 26 and 27, will present the name of Colonel James A. Sexton, of Chicago, as a candidate for national commander.

## NEW MINING SCALE HAS BEEN RATIFIED

### ILLINOIS STATE CONVENTION CONCLUDES ITS WORK

Great Crusade Has Been Planned—Miners of Pennsylvania Will March Through the Whole Territory Where Coal Is Being Dug—The Situation in Illinois and Indiana.

Springfield, Ill., Aug. 7.—The state convention of United Mine-Workers consumed almost the entire day Friday in the discussion of the scale committee's report. The new state scale is based upon the Columbus scale of 1894 and the relation of this field to Indiana, Ohio and Pennsylvania. Action was taken looking to a thorough organization of all mines now working, and delegates were instructed to collect funds among the men of their respective mines to pay the expenses of sending organizers into southern Illinois. David Jones, R. Voight and M. C. Schilling were appointed a committee to go to St. Louis to solicit funds to maintain the strike. Considerable discussion was had over the fixing of a state price for power, but it was finally agreed to leave this matter to the several districts to be settled locally.

The new scale proposes an increase all along the line over the wages that were being paid at the time of the late suspension. The chairman of the scale committee estimates that the raise in the Broadwood field will be about 20 cents per ton; in the Streator district, 11 cents per ton; in La Salle and Springfield Valley, 15 cents per ton; in Peoria, 12 1/2 cents, and in fields south, including Minonk, Springfield, Danville, Grape Creek and Belleville, about 10 cents per ton. Gov. John R. Tanner was called upon to make an address. He said he would co-operate in any manner to bring about a settlement of existing difficulties, but did not think it lay in the power of representatives, congressmen, senators and the governor. He urged the men to adopt a scale and submit it to the owners and he promised to use every means in his power to induce the operators to adopt the scale. A resolution to supply farmers with coal for their thrashing was voted down.

### GREAT CRUSADE PLANNED.

Eight Thousand Men to Be Put in Motion in Central Pennsylvania.

Pittsburg, Pa., Aug. 7.—The proposed campaign against the mine-owners of Westmoreland county and the operators of central Pennsylvania, which has been delayed, is now an assured fact. The strike leaders decided on it definitely at a camp conference Friday, and a big move will probably be made next Wednesday. As already constituted, the plans propose a direct march through the whole territory where mines are being operated until Clearfield county is reached. Camps will be left at each of the De Armit mines at Canonsburg, at Buena and any other place that may seem necessary to keep the mines closed which appears before the crusaders leave. The leaders estimate that with what will remain behind in the camps at least 8,000 men will be kept constantly in the movement.

### Miners Win and Lose.

Sullivan, Ind., Aug. 7.—Indiana crusader miners are on the move, and from all indications before to-night 2,000 miners from the Clay, Sullivan and Greene county districts will be in the neighborhood of Ayrshire and Little's, where the miners are at work in the mines of D. Ingle and the S. W. Little Coal companies. Daviess county miners were successful in closing the mines at Princeton and Oakland City, but all endeavors in Pike and Vanderburg counties were unsuccessful.

### Dolan Held to the Grand Jury.

Pittsburg, Pa., Aug. 7.—Justice W. H. Semmons of Turtle Creek denounced his decision this afternoon in the case of the miners' leaders charged by Superintendent T. B. De Armit with riot and unlawful assemblage. He held District President Patrick Dolan, Jacob Aufholder, William McKay and Paul Trimmer to answer in court. Bail in the sum of \$300 each was given.

### May Be Trouble at Odin, Ill.

Odin, Ill., Aug. 7.—Mayor Farthing has given positive instructions to the crusaders encamped outside the city limits not to appear in town earlier than 7 o'clock. The mine is still running, but the visitors declare their intention of causing a complete shutdown and may attempt force. A score of deputy marshals are guarding the mine property.

### Will Not Quit Work.

Kewanee, Ill., Aug. 7.—Gilchrist and Spring Valley strikers have massed themselves 500 strong in the vicinity of the Galva mines, apparently to no purpose. The miners at the Murray shafts persist in working, and no inducement or persuasion has thus far been able to move them.

### Troops to Be in Readiness.

Pittsburg, Pa., Aug. 7.—Definite orders have been issued from Harrisburg to local officers of the national guard of Pennsylvania to hold themselves in readiness for immediate service.

## ENGLAND'S ANSWER TO SILVER ENVOYS

### GREAT BRITAIN TO GIVE ITS DECISION IN OCTOBER.

Senator Wolcott Is Very Hopeful—Believe There Is a Prospect That the Indian Mints Will Be Reopened—London Financial Circles Opposed to Any Change

London, Aug. 7.—The British government has informed the American bimetallic commission that it will probably reply to the proposals of the commissioners on behalf of the United States in October. While this postponement of Great Britain's decision delays the work, the American envoys do not consider it discouraging. On the contrary, they think Great Britain's interest in the question justifies them in expecting that the Indian mints will be opened. They believe that the Times in opposing the reopening of the Indian mints does not represent the government, but rather the city financial circles, which are opposed to any change. The report made to the government from the mint is understood to be favorable to silver.

### DEATH LIST GROWS.

Two More Victims of the Elevator Fire at Chicago.

Chicago, Aug. 7.—Two more victims have been added to the list of those who lost their lives at the Northwestern elevator explosion. One died in the hospital and the other, who was seen near the elevator just before the explosion occurred, is missing and most probably was killed. The identity of the man who was blown into the river has not yet been established nor his body recovered. The two victims:

CHARLES M. CONWAY, driver engine company No. 27.

THOMAS MONAGHAN, driver for Chief Swenick, probably blown into the river and drowned; body not recovered.

Whether the elevator took fire from spontaneous combustion among dust mites, or from a "hot box" somewhere in the machinery, which found an available quantity of grain dust to act as tinder, or from a spark from the outside, or from some unguessed cause, those most concerned believe it will never be determined. Theories are abundant by which the accident might have been brought about, but it is generally believed igniting dust clouds set free by falling timbers caused the great concussion.

### Citizens Avert a Lynching.

Iron Mountain, Mich., Aug. 7.—The appeals of leading citizens prevented a lynching at Crystal Falls. The miners employed in the surrounding locations are now making threats, and a well-defined report is current to the effect that they have formed an organization and will invade the village for the purpose of lynching Bons. In the meantime it is expected that Sheriff Walte will take the precaution to remove the prisoner to another county. Bons' confession was made a second time in the hearing of Attorney Henderson of Norway and M. B. McGee, a leading citizen. The prisoner is believed to be insane.

### Woman's Missionary Convention.

Ligonier, Ind., Aug. 7.—The woman's missionary convention of the Indiana conference branch of the Evangelical Church convened Friday at Oakwood Park, Syracuse. The enrollment of delegates showed all societies in the conference represented.

The Young People's Alliance, in session at Oakwood Park, elected Rev. S. Steinger, Huntington, president. The statistical report showed ninety-six alliances within the conference district, with a membership upward of 4,000.

### Sherman Returns to Work.

New York, Aug. 7.—Secretary of State John Sherman, who has been taking a short rest at Amagansett, Long Island, left for Washington Friday. "It is not true," he said, "that I am hurrying to Washington to attend to any grave matters of business. I know of no question which will be of much greater importance than another. The country seems to be prospering internally, and nothing but peace is along our borders. It would be hard to make anything now but a proclamation of peace."

### Big Shortage at Chester.

St. Louis, Mo., Aug. 7.—Thomas Westcott, of Fairfield, Ill., one of the commissioners of the Illinois penitentiary at Chester, who came from that city Friday, said there is a shortage of from \$6,000 to \$10,000 in the accounts of Orla Havil, a former clerk of that institution. Mr. Westcott said: "We have not finished our investigation, but enough has been learned to warrant the arrest of Orla Havil. The shortage will be between \$6,000 and \$10,000."

### Will Help the Coal Strikers.

Joliet, Ill., Aug. 7.—The 1,900 employees of the Joliet rolling mills have decided to give one day's wages to the striking miners. It is figured that considerable over \$2,000 will be forwarded. Some day during the present month will be selected.

### Indiana Spiritualists Meet.

Anderson, Ind., Aug. 7.—The eighth annual conference of Indiana spiritualists met Friday and elected officers. George W. Parkinson of Yorktown is president.

## NOT HAWAII'S SPONSOR.

Secretary Sherman Says Japan Must Settle With the Islands Alone.

Washington, Aug. 7.—The United States will not guarantee the carrying out of the terms of arbitration between Hawaii and Japan if the decision of the arbitrators be against the former. So said Secretary of State John Sherman. It was a matter between the countries in interest, he said. If the treaty of annexation is ratified before the arbitration is concluded, then the arbitration failed, the secretary explained. He left the inference that the matter of Japan's claims against Hawaii might then be a special subject of legislation by congress.

### Plans to Surprise the World.

Washington, Aug. 7.—The German government has in course of preparation an exhibit for the Paris exposition of 1900 which is expected to surpass anything of the kind ever attempted by any nation. This statement is made by Consul General Mason of Frankfurt, Germany. Mr. Mason reports that Germany is doing everything possible to extend her commerce, having recently sent commissions to China and Japan and South America for this purpose. Her trade with the United States is being fostered as much as possible and he predicts that Germany will continue to follow this policy in the hope of eventually being the greatest commercial power of the world.

### France Now Looks to Britain.

London, Aug. 7.—The Paris correspondent of the London Daily Mail reports an interview with the vice-president of the French chamber of commerce on the subject of tariffs, in the course of which he admitted that France has no way at present of bringing pressure to bear upon the United States. "But," he said, "the time has now arrived for France to reconsider her whole commercial position and to readjust her tariff arrangements, particularly in the way of making special treaties with Great Britain and the British colonies."

### Big Silver Mines to Close.

Park City, Utah, Aug. 7.—Superintendent Chambers of the Ontario and Daly mines has received a telegram from New York to close down both mines at once, owing to the recent decline in silver. These are two of the largest silver mines in the state, and give employment to about 700 men. The Ontario mine is one of the greatest producers in the country, and has been in active operation for twenty years and has paid about \$13,500,000 in dividends. It is claimed that these mines can not be worked with profit at the present price of silver.

### Great Wheat Crop in Kansas.

Topeka, Kas., Aug. 7.—The August report of the state department of agriculture gives the aggregate yield of winter wheat in Kansas for 1897 at 49,502,087 bushels, or an average of 14.91 bushels per acre on the 3,318,563 acres sown. The quality is uniformly good in all counties. Estimates indicate that 40 per cent of the crop will be marketed within sixty days. Assessors report 1,604,796 bushels of old wheat on hand. The yield of spring wheat this year was 1,087,612 bushels.

### Tennyson Memorial Unveiled.

London, Aug. 7.—The dean of Westminster unveiled Friday on Freshwater Downs, Isle of Wight, the Tennyson memorial beacon. The beacon, which will take the place of one that has long stood there, is in the form of an Ionic cross, and is visible for miles. Its site is in the immediate vicinity of the poet's favorite walk. The Rev. Joseph Harriman, chairman of the memorial committee, pointed out that a considerable portion of the subscriptions came from the United States.

### Not Over \$800,000.

San Francisco, Cal., Aug. 7.—Speaking of the Klondike output of gold the chief clerk of the mint said: "All the gold brought to this city from the Alaskan mines will not exceed \$800,000 and all that has been taken this year and sent to other mints of the country will not exceed \$2,000,000. The gold from that part of the country is generally from 700 to 800 fine, and some of it ran to 900, the average being worth from \$15.50 to \$17 an ounce."

### Victory for the Liberals.

London, Aug. 7.—The parliamentary election to fill the vacancy in the Sheffield division caused by the death July 21 of Anthony J. Mundella, liberal, resulted in a victory for the liberal and radical candidate, Frederick Maddison, who polled 4,289 votes, against 4,106 polled by the conservative candidate. Mr. Maddison is a well-known labor leader.

### Big Strike in Sight.

Chicago, Aug. 7.—Union workmen employed on the forty-seven public school buildings in course of construction in Chicago will be ordered out on strike on Monday morning. The Building Trades' Council decided on this action at its meeting Friday night in hope of forcing the board of Education to recognize organized labor.

### Fight Over An Indiana Law.

Indianapolis, Ind., Aug. 7.—The shortest law passed by the recent legislature, the one providing that the term of county treasurer shall be Jan. 1 next following the term of the present incumbent, promises to bring a great deal of litigation. The terms of the present treasurers are now expiring, and in nearly every county there is a controversy as to the succession.

## IS C. I. MARTIN DEAD OR ONLY HIDING?

### STURGEON BAY MAN'S DISAPPEARANCE A MYSTERY.

Three Years Have Elapsed Since He Left the City To Cruise About the Bay in a Sail Boat—It Is Said That He Was Not Drowned, But Is Hiding.

Marquette, Aug. 7.—A report is in circulation here that Charles I. Martin, a well known business man of Sturgeon Bay, who disappeared with two companions three years ago and were supposed to have been drowned, is alive and living somewhere in the west, although persons who are acquainted with the facts refuse to present to divulge his place of abode. Martin and two fishermen started on a cruise around the bay in a sail boat and that was the last seen of them. All efforts to find a trace of them failed. The general belief was that they were drowned. Last week the body of an unknown man was found on the beach and was believed to be Martin, although the remains were so badly decomposed that recognition was impossible. The mystery is as great as ever.

### Hog Cholera in Manawa.

Manawa, Aug. 7.—Hog cholera has broken out here in a severe form. At Farmer Crane's place one hundred and fifty hogs have died from the disease, and others are effected. Precautions have been taken and the disease will not spread to other herds.

### Swam Across Lake Mendota.

Madison, Aug. 7.—George Whare of Milwaukee, this morning swam across Lake Mendota, a distance of five miles, in three hours and ten minutes.

### Public Forest Is to Be Cut.

Ashland, Wis., Aug. 7.—Capt. Scott of the LaPointe Indian agency of northern Wisconsin and Michigan has received official instructions from Washington to advertise at once for bids for cutting and manufacturing into lumber the forest of the Red Cliff reservation, near Bayfield, all to be done on the reservation. The official estimate of the timber on the reservation is 100,000,000 feet. Under the contract which will be let the successful bidder will be required to construct a mill on the reservation and to saw not less than 10,000,000 nor more than 20,000,000 feet each year.

### Secret Crusade Against a Law.

West Superior, Wis., Aug. 7.—The statement is made on reliable authority that there will be an attempt made to repeal the new Wisconsin fire and police law. The state legislature convenes on Aug. 15, and the business to come before it is the report of the committee on revision of the statutes. Mayor Starkweather and others in different cities in the state are behind the move.

### Youngest College President.

Morgantown, W. Va., Aug. 7.—Jerome H. Raymond, professor of sociology in the University of Wisconsin, was on Friday, elected president of the West Virginia University by the board of regents. Professor Raymond is the youngest college president in the country, being only 29 years of age.

### SELL FOR \$15,000,000.

Gold Creek Mining Company of Nevada Transfers Its Properties.

New York, Aug. 7.—The Tribune says

"The boom in gold mining ventures that the Klondike discoveries has started in this country has apparently spread to England. For some time agents representing several syndicates of London capitalists have been in this city endeavoring to acquire gold mines of proved value for exploitation on the British markets. The latest deal reported in this city is the sale by the Gold Creek Mining Company of Nevada of its property to a British syndicate for \$15,000,000. The original capital stock of this company was \$300,000."

### Would Bring Smallpox.

Columbus, Ohio, Aug. 7.—The miners' national officers were much exercised Friday over a report from West Virginia to the effect that the operators propose to bring negroes from Alabama. Smallpox is epidemic in the localities from which the new men must come.

### Modern Woodmen Case to Be Heard.

Rock Island, Ill., Aug. 7.—The two injunctions recently issued by the master in chancery of Whiteside county to prevent the Order of Modern Woodmen from removing its headquarters from Fulton, Ill., to Rock Island, will be argued before Judge W. H. Gest of Cambridge next Tuesday.

### McKinley Will Visit Buffalo.

Buffalo, N. Y., Aug. 7.—Commander McConnell, of Columbia post, Grand Army of the Republic, of Chicago, who is in this city, has received a letter from Private Secretary Potter, announcing the acceptance by President McKinley of an invitation to a banquet to be tendered him by the post in this city on Aug. 24.

### John W. Foster Returns.

New York, Aug. 7.—John W. Foster, the commissioner sent by President McKinley to England to confer with Lord Salisbury

CONTRACT NO GOOD  
MR. MERRILL SAYS

HE ANSWERS THE LIGHTING  
COMMITTEE.

Asks Lawyers To Tell Him Where  
the Agreement Protects the Inter-  
ests of the People—Council "Buys  
a Pig in a Poke"—Some Other  
Facts.

To THE PUBLIC—The cat is out of  
the bag. The lighting committee,  
through its chairman, has at last  
given us an "explanation"—that does  
not explain. In order that the people  
may know just what the city is to get  
in the way of lights, I will present a  
copy of the contract and bond. They  
are as follows:

The contract is as follows:  
This agreement, made this seventh day  
of July, A. D. 1897, by and between the city  
of Janesville and Pliny Norcross, witnesseth,  
that Norcross agrees to furnish to and for  
the city of Janesville one hundred and fifty-six  
(156) lamps of the same kind, quality and  
candle power as those now in use in said city,  
and to keep the same lighted from one-half  
hour after sundown until within one-half hour  
of sunrise, every night during each year for and  
during the term of three (3) years from July 10th  
1897, for the consideration and price of sixty-five  
(\$65.00) per annum per lamp, payable in equal  
monthly payments, and to furnish and keep  
lighted as aforesaid, such additional lamps of  
the same kind, quality and candle power, and  
for the same price per lamp per annum, pay-  
able as aforesaid, as the said city may from time  
to time during said term direct, said lamps to be  
located as said city may direct.

Said city agrees to pay to said Norcross, his  
heirs, executors, administrators or assigns, for  
the furnishing and lighting of the said one hun-  
dred and fifty-six (156) lamps, and for the  
furnishing and lighting of each such additional  
lamp as it may order during said term, the said  
consideration and price of sixty-five dollars  
(\$65.00) per lamp per annum, payable in equal  
monthly payments during the said term of three  
(3) years.

Said Norcross also agrees to light with incan-  
descent lamps without extra charge to the city,  
both in the houses and the rooms of the city  
treasurer and city clerk and common council  
and the said city to wire said buildings and  
rooms therefor.

In witness whereof, the said Pliny Norcross  
has hereunto set his hand and the said city of  
Janesville has caused this agreement to be exe-  
cuted on its behalf by its Mayor on this 7th day  
of July, A. D. 1897.

[Signed] PLINY NORCROSS,  
City of Janesville, by  
JOHN THOROUGHGOOD,  
Mayor.

The bond is as follows:  
Know all men by these presents: That Hon.  
Pliny Norcross as principal and William Ruger  
as surety, both of the city of Janesville, Wis-  
consin, be held and firmly bound unto the city  
of Janesville in the sum of five thousand dol-  
lars, lawful money of the United States, to be  
paid to the said city of Janesville, for which  
payment well and truly to be made, we bind our-  
selves, one and each of our heirs, executors and  
administrators, jointly and severally, firmly by  
these presents.

Sealed with our seals. Dated this 7th day  
of July, A. D. 1897.

The condition of this obligation is such that if  
the above bonded Pliny Norcross, his execu-  
tors, administrators or assigns shall in all  
things stand to and abide by, and well and  
truly keep and perform, the covenants, condi-  
tions and agreements in a certain contract of  
even date herewith for furnishing lights to the  
city of Janesville, contained and on his part to be  
kept and performed as in said contract speci-  
fied, then the above obligation shall be void, else  
to remain in full force and virtue.

Sealed and delivered  
In presence of [Signed]  
J. V. NORCROSS, PLINY NORCROSS, [Seal.]  
H. McLEROY, WM. RUGER, [Seal.]

"I want to ask the lawyers of  
the city of Janesville what that contract  
is worth. Lawyers tell me that it  
simply binds the city to pay the con-  
tractor \$65 per year for any kind of  
arc lights that he sees fit to fur-  
nish. In other words, so far as the  
city is concerned, the contract is not  
worth the paper it is written on, ex-  
cept that the contractor must collect  
his pay, and keep the "lights" run-  
ning, or forfeit his bond. I want to  
call the attention of the people to this  
document. Then I want to ask the  
people if they think the city officials  
who drew or signed such an agree-  
ment in behalf of the people, were  
true to their trusts.

No good business man would "buy  
a pig in a poke." No good business  
man would contract for anything that  
was to cost \$10.140 per year, for three  
years, without a written agreement as  
to the quality of the article. Yet that,  
in effect, is just what the city has  
done. The chairman invites a  
comparison with Janesville. He says:

"In regard to the petition presented to the  
council at the last meeting, stating that the  
contract was awarded to the biggest bidder, I wish  
to say, if any man who signed that petition will  
mention any fair-sized city in the United States,  
where there is a reasonable comparison in the  
number of lights, candle power, time of lights  
running, etc., with the plant in this city, that  
has a contract for electric lights at a lower price  
than this contract calls for, I will agree to  
put a Welsbach street lamp in front of his house  
lighted free of charge every night in the year."

If the chairman will tell us what  
candle power the lights now in use  
are, we will be able to make a com-  
parison. Unless he does so, he is  
safe in making any kind of a proposi-  
tion for the purpose of justifying the  
action of the council. If the council  
had allowed the gas company to bid  
on "gas lamps," without reference to  
the size and kind of burners, the gas  
company might have named a price

that might astonish the people. How-  
ever, the gas company bid on honest  
lights and did not let the a derman  
think the lights were one thing, when  
in reality they were something else.  
The committee has ruled on the bids  
of the gas company and the Janesville  
Light and Power company with an  
iron hand. Why was the committee  
not equally exacting with the con-  
tractor? Why was he given a con-  
tract that is iron clad as far as his  
interests are concerned, but of no  
value, comparatively, to the city?

The chairman speaks of the "great  
progress of electricity." I would like  
to have him explain how Janesville  
electricity has progressed.

He says the council reserved the  
right to reject any and all bids so as  
"to give the council the power to  
shape any arrangement that would  
result in as good, or better light, at  
less cost." We all know what better  
light is, but will the chairman tell us  
what "as good light" is? The con-  
tract, which is the only agreement the  
city has, does not tell us.

He says that "material, quality and  
satisfaction are to be considered as  
well as price." I agree with him. The  
council, however, has evidently failed  
to consider these conditions. Read  
over the contract, Mr. Chairman, you  
may not have read it carefully, and  
tell me where the city is to get "mat-  
erial, quality or satisfaction." Per-  
haps you can tell us, but lawyers who  
are used to drawing contracts can-  
not.

The committee, the chairman's let-  
ter would indicate, prop-osed to renew  
the present contractor's contract and  
make the gas company a convenience  
to bolster up the deal in silencing  
complaints. Because the gas com-  
pany refused to longer do business  
with the city at a loss, the committee  
"was surprised." It is rather sur-  
prising, isn't it?

The chairman says "it is a well  
known custom in trade to give the  
purchaser reduced prices according to  
increasing quantities purchased." That  
is true, and the gas company followed  
the custom. It made the city as low,  
if not a lower price for an "increased  
quantity," than was ever made in the  
United States—and the committee did  
not entertain the proposition. For  
such gas lights as the committee de-  
sired for "chinking in," however, the  
members were willing to pay less than  
the lights cost, and are angry because  
the gas company refused to furnish  
them. Generous committee!

The chairman says the gas company  
was "hasty" in taking off the lights  
"before the council ordered them off."  
When the gas company gave the coun-  
cil notice that the lights could be  
taken off, no provision having been  
made for retaining them, the mayor  
announced that "as no one was kicking  
but the gas company, he would let  
the matter rest right where it was."  
The gas company was not asked to  
leave the lights on, or they would not  
have been removed.

The taxpayers who signed the peti-  
tion against spending the money the  
way it was spent, will be doubtless be  
glad to hear, as the chairman says,  
that the committee is now getting  
ready to spend the balance of the ap-  
propriation.

The chairman says that no one  
would consent to have arc lights re-  
moved from in front of their residence.  
I do not blame them. If \$65 lights  
must be used, people naturally like to  
have them. But I think as many com-  
plaints have been made because of the  
removal of the Welsbach lights. The  
argument that people objected to the  
removal of an arc light is not a good  
one anyway. There are comparatively  
few residences that have an arc light  
in front of them. By far the larger  
proportion of the homes do not have  
an arc light within a block of them.  
In leaving the arc lights on to please  
the few, the committee has done an  
injustice to the many. This state-  
ment simply illustrates my point—  
that the committee has not acted to  
the best interest of the people at large.  
It also illustrates my point that arc  
lights light the city in spots while  
the Welsbach lights would light the  
city all over, and at a less cost.

I am glad the committee has made  
this explanation. It shows conclu-  
sively that there is but one side to this  
controversy. The people can judge,  
better now whether or not their in-  
terests have been carefully protected  
by their representatives. There has  
also been much discussion as to the  
candle power of the "lights now in use,"  
and as the chairman invites a com-  
parison, he will probably settle this  
mooted question at once by telling us  
just what candle power the lights are.

I doubt if another city in the United  
States has a contract for electric lights  
that does not specify the candle power  
to be furnished. Regarding the often  
quoted "low price" made by the con-  
tractor, I also have a word to say.  
The Milwaukee Sentinel of Thursday  
morning announces that the city of  
Kaukauna has just closed a contract  
for lights of 1,200 candle power, at  
\$65 per year. Janesville was offered  
lights of 1,200 candle power at \$60 per  
year, but took lights of no stated can-  
dle power at \$65 per year instead.  
My taxes last year amounted to  
\$815.71. I am loth to pay any such  
amount of money to the city this year,  
without knowing what I am to get for  
it. The contract sheds no light on  
the subject, so I shall await the reply  
of the chairman with interest.

Respectfully, HIRAM MERRILL.

No effort should be spared in making announcements attractive, but the effort should not be apparent in the advertisement itself when it is printed.

## "HOPELESS."

A day ago and the world seemed full of happiness. Flowers were blooming, and the sunset's glow tinted all things. As it silently vanished, in the gloaming. Gone, with all its glorious rays. That had made the earth so fair; So, from my heart fled all hope—No more to enter there.

Hopeless, ah! How weird the sound Of the word; it banishes joy, for aye. That once made life so bright for me. Ere I knew of the birth of this sad today. That which seemed so true and real. Proved but an empty fleeting dream. The love that made of earth a heaven. Lost in the smile of a bright sunbeam.

O! my dear love, thy heart doth not ache, Mine alone must feel the blight. And the curse of endless, hopeless love. That burns and sears my soul tonight. No ray is left, all, all is dark. O! death, I too now long for thee. Since thy gentle heart has ceased to beat, I too must forever parted be.

BIBBA DROF.

His Genuine Grief.

In the twilight he sat, sadly caressing the brown strands of hair that he held in his hand.

His thoughts went back to the past, to the love and delight of it.

And yet it had been a mistake, their joining hands. Their natures were composed of two different elements. There had been tears and quarrels without end.

Still, lingering on that chestnut braid before him, his thoughts were filled with regret.

For remembrance! Yes, they were full of memories, these locks. Memories of her raging, and storming, and fighting!

In memory of all of which he sat there, tenderly, regretfully caressing a lock of his own hair.

The Cat's Revenge.

Not having sufficient confidence that a cat which he procured would rid his house of mice, a man in the City of Mexico sprinkled a banana skin with strychnine and left it where the mice could get it. The cat took the skin and dropped it into the water jar, and the whole family were poisoned. Their lives were saved by applications of the stomach pump.

A Resolution.

"We will still pursue our course," said the speaker. "The bloated bondholder, the politician, the millionaire and the swells, we shall still cut them."

"We will!" thundered the assemblage.

And then the regular meeting of the Barbers Union No. Umitty-umpty adjourned.

Loaf Sugar.

"Father," said the bright little girl, "what is loaf sugar?"

"There are several kinds, my dear," replied Senator Sorghum. "The most important variety is that which enables a man by a little superior knowledge and prompt action to place himself beyond the necessity of working any more."—Washington Star.

Jowett and the Student.

The late Prof. Jowett of Oxford had a curious way of commenting on the work that was brought to him by students. On one occasion he was shown a set of Greek verses. After looking them over carefully, he glanced up rather blankly and said to the author, "Have you any taste for mathematics?"

How He Made a Saving.

"That mine up in Tuolumne county is costing me a mint of money," said a local capitalist to one of his employees. "I wish you would figure around and see if you can't make a saving somewhere. If you can I'll raise your salary \$50 a month."

"But suppose I can't make a saving of \$50 a month?" inquired the young man.

"Well, I've tried to figure it out myself, and I can't find where I can save a cent. If you can you are worth \$50 a month more."

"All right, sir. I'll look into it."

The young man went over all the accounts, but he could not find where he could cut down a single expense. Finally it occurred to him that he was drawing \$25 a month for acting as secretary of the mining company.

"I've found a place where you can save \$25 a month," he informed his employer the next day. "I've cut off that salary of \$25 a month we've been paying the secretary for doing nothing."

He got his raise.—San Francisco Post.

Deficient in One Point.

Johnnie Masher has been calling very regularly at the McGinnis mansion, in Harlem, but fails to come to the point as far as proposing to Birdie is concerned.

"He is such a learned man!" exclaimed Birdie, rapturously. "He knows how to explain everything."

"Except his object in calling here so often to see you," said Mrs. McGinnis prosaically.

One Thing He Didn't Know.

Miss Penelope Peachblow—"Whoever is that dreadful-looking man?" Mr. Jonathan Turnip—"That? Oh, that's Prof. Digley, who knows everything. He's considered the most profound scholar in America."

Miss P.—"Well, why doesn't he get his hair cut?" Mr. J. T.—"Doesn't know enough, I suppose."—New York Tribune.

Certainly Doomed.

Fortune Teller—"The lines in your hand are very distinct. You will die just twenty years from the date of your birth."

Victim—"But I'm past twenty now."

Fortune Teller—"Ah! it was my mistake. I was reading the lines backward. You will die just twenty years before the date of your death."

A Working Knowledge.

"I thought you guaranteed a working knowledge of French in five weeks," said the puzzled and disgusted pupil.

"So I did," said the professor, blandly. "You know enough French now to work out the rest by yourself."—Washington Times.

Mighty Valuable Property.

A writer on Hawaii says that in acquiring the island the United States "will get two of the grandest volcanoes in the world."

The inducement is strengthened by a scientific announcement that the heat of volcanoes can be used to generate power.

Does a Great Deal.

"My good man, do you ever do anything to bring light and purity into the homes of your fellow-men?"

"Yuss, lots."

"You distribute tracts?"

"No; I clean windows and beats carpets."—Illustrated Bits.

THIS DAY IN HISTORY

44—Herod Agrippa, persecutor of the apostles, died.

1106—Henry VI, the Great, emperor of Germany, died.

1778—300 buildings burned in New York.

1820—Joseph Rodman Drake, American poet, born in New York city; died 1850.

1820—Louis Philippe, duke of Orleans, was chosen king of the French by the chambers; he was installed on the 9th, abdicated and died in February, 1848.

1888—William P. Davidge, American actor, died in Wyoming; born 1814.

1894—Auguste Nicolas Cain, famous French sculptor of animals, died in Paris; born 1822.

1905—Associate Justice Edmunds Howell Jackson of the United States supreme court died at Belle Meade, Tenn.; born 1838.

ROUND BASIS FOR CEREALS.

These are some of the conditions on which predictions of large business this fall are based by Bradstreet's:

1. Crops are good.

2. The price of wheat and cotton has so greatly advanced as to pour scores of millions of dollars into the laps of the farmers, while the price of other staples has advanced in sympathy with these.

3. Short crops in Europe, India and Argentina assure a continuance of these high prices during the market season.

4. Merchants everywhere are replenishing their stocks of goods as they have not done for several years past.

5. In consequence railroad earnings everywhere show improvement.

6. There are already signs of revival in industry, the manufacturers beginning to anticipate the new demand for goods.

7. Our exports for the last year have been so enormously in excess of our imports as to make us very heavily a creditor nation—a condition that does not guarantee prosperity but tends strongly to help it.

8. There is everywhere among the farmers a feeling of hopefulness which has not existed for several years past.

Add to this the significant fact that the first week of the Dingley act was the best business week the country has had in several years, and the prospects may well be considered hopeful.

Of course, as suggested by the summary of favorable conditions, the actual operation of the new tariff is not the sole cause of the improvement, and yet it must be remembered that the enactment of the Dingley law brought certainty as to the sort of a tariff which the country will have for four or five years at least; removed all danger of subsequent treasury deficits, and furnished adequate protection to the industries which were denied it by the Wilson act. These operations cannot fail to have a deep influence on the trade movement here and in other lands.

It is difficult to understand why the force of holding a state election should be gone through with in Virginia, as present election laws make the ratification of the work of the democratic state convention a foregone conclusion, regardless of the sentiment of a majority of the voters.

Canada may find it very bad policy in the end to be greedy in its dealings with Americans who are in or who may go to the Klondike gold region. The exact boundary line between the property of the United States and of Great Britain in that locality is yet to be determined.

One of the political signs of the times is the failure of democratic platforms to abuse protection. "Excessive taxation" is now used by the democrats to avoid offending those members of the party who have openly declared their belief in a protective tariff.

It doesn't matter what Boss Gorman put in or left out of the Maryland democratic platform, Gormanism is to be the leading issue, and there is reason to believe that it will be permanently overthrown and a republican legislature elected.

Greek promises have no market value in the eyes of the Turkish sultan, and the money must be forthcoming before his troops will be withdrawn.

All the fools are not dead yet; some of them thought it strange that the president should register himself and wife as Mr. and Mrs. Wm. McKinley.

Senator Gorman isn't conducting his Maryland campaign as if he expected to follow Bryan and free silver in 1900.

There would be no cause for American tears in a tariff war between England and Germany.

## THE CALL OF DEATH IS HEARD.

Funeral of Mrs. S. A. Carey.

All that was mortal of the late Mrs. Stephen A. Carey was laid to rest in the Afton cemetery this morning. Rev. E. H. Pence conducted services at 10 o'clock from the Pearl street home, and the song service was rendered by Messrs. and Meesdames Arnold and Crawford. The flowers were many and beautiful. The bearers were H. L. Phillips, L. M. Nelson, J. G. Wray, Sherman Phelps, George Phelps and Edwin Bocker. All were members of Company F, Sixteenth Wisconsin with the exception of George Phelps.

Helga Helgason.

Helga Helgason died just as the ship entered the port of Christiansia. He was a resident of Jamesville for twelve years and had many friends.

He married two years ago. Recently that dread disease, consumption, warned him that he must soon die, so accompanied by his wife he started for his fatherland, seemingly becoming stronger each day on the ocean trip, but sunk off while asleep into that sleep that knows no waking on 18th and was buried the 22nd of July.

Mrs. Bridget Clark.

Mrs. Bridget Clark died this morning, at her Cherry street home, aged sixty-seven years, after several days of suffering from heart trouble. She left four sons and a daughter, they being John, Joseph and Edwin of this city, and James and Mrs. Kate Messerschmidt of Milwaukee.

The funeral will be held Monday, and notice will be given later.

Alligator Caught at New York.

An alligator eight feet long was captured while swimming in the East river at New York Sunday, after fighting viciously with two men, who lassoed the reptile with a rope. With the aid of a boat hook the alligator was dragged upon a dock upon the Brooklyn shore. The experience proved too much for the alligator, which soon died. It is believed the alligator escaped from the aquarium or some ocean steamer.

Very Considerate.

"Yes, Mildred is going to be a very economical wife."

"How do you know?"

"Why, she consented to be married along in the middle of the day, just to make it unnecessary for her husband to get a new dress suit."—Cleveland Leader.

Nothing Personal.

Tidings of Andree.

Paris, Aug. 7.—The Gaulois says that a pigeon bearing instructions regarding Professor Andree's balloon expedition across the north pole has been captured at Gradisea, near Coritz, twenty-two miles from Trieste, in Austria-Hungary.

The Family Friend.

No remedy has a better right to that title than Kickapoo Indian Oil. It is good for internal and external use, and it is pains' most powerful panacea. No one can say "I won't have neuralgia, rheumatism, carache or any other acute pain." But every one who knows there's a bottle of Kickapoo Indian Oil in the house can say: "I won't have neuralgia or any other pain long." The power of this oil over pain is the greatest marvel of modern medicine. It controls pain at once. It cures the cause promptly. There's no remedy reaches so many kinds of pain as

Kickapoo Indian Oil.

Claims 2,700 Were Killed.

Simla, Aug. 7.—The British opolitical officer at Malukand reports that practically all the tribes joined in the late attacks on the British forces in the Chitral district. He adds that 2,700 men of the enemy were killed and that in addition many of the tribesmen were wounded. The latter are greatly disheartened and much further resistance is not likely.

Harsh Words on Consul at Apia.

Berlin, Aug. 7.—The Colonial Journal here brands the new American consul at Apia as "an unscrupulous man, who considers all means justifiable to reach an end." This statement is used as a basis for demanding that the government deal with Samoa as the United States has with Hawaii, as the only possible means of protecting German interests.

July Deficit Was Heavy.

Washington, Aug. 7.—Secretary Gage is not particularly perturbed over the treasury deficit of \$11,000,000 for July, large as it is. The two principal causes of the deficit are the heavy demands made by the urgency deficiency bill and pension payments. The expenditures for last month exceeded those for July, 1896, by \$8,000,000.

Dr. Fillebrown Is President.

Newport News, Va., Aug. 7.—The American Association of Dentists and Southern Dental association, which organizations have been in convention at Old Point Comfort since Monday, have united into one body, with Dr. Thomas Fillebrown of Boston as president, Dr. George H. Cushing of Chicago was elected secretary.

Ended the Session.

London, Aug. 7.—The house of commons met Friday at 10 o'clock and passed to the third reading of the appropriation bill, which was then forwarded to the house of lords, where it passed all stages. Both houses then suspended business until 2:30 p. m., when the queen's speech proroguing parliament was read.

Rebels Too Strong to Ignore.

Montevideo, Uruguay, Aug. 7.—The rebels are in conference with the president as to terms of peace and have declared they are willing to sign a new peace agreement which does not ignore their demands. It is believed that an agreement will be signed this week and that the war will end.

Farmers Should Be Happy.

Washington, Aug. 7.—Secretary of Agriculture Wilson estimates that the increased price of farm products the past year will amount to \$500,000,000. The increase in the value of the wheat crop alone is estimated at from \$75,000,000 to \$100,000,000, as compared with last year.

Glass Workers' Wage Scale Fixed.

Millville, N. J., Aug. 7.—The glass workers and the manufacturers of the American Flint Glass Workers' Union have settled the wage scale for the coming season. The only change in the scale is an advance of 6 per cent on grinding ware.

## COMMON SENSE CURE.

Pyramid Pile Cure Cures Piles Permanently by Curing the Cause.

Remarkable Remedy Which is Bringing Comfort to Thousands of Sufferers.

Probably half the people who see this article suffer from piles. It is one of the commonest diseases and one of the most obstinate. People have it for years and just because it is not immediately fatal they neglect it. Carelessness causes no end of suffering. Carelessness about so simple a thing as piles has often caused death. Hemorrhages occur from no apparent cause and loss of blood causes death. Hemorrhages occur during surgical treatment, often causing death.

Piles are simple in the beginning and easily cured. They can be cured even in the worst stages, without pain or loss of blood, quickly, surely and completely. There is only one remedy that will do it—Pyramid Pile Cure.

It allays the inflammation immediately, heals the irritated surface and with continued treatment reduces the swelling and puts the membranes into good, sound, healthy condition. The cure is thorough and permanent.

Here are some voluntary and unsolicited testimonials that we have lately received:

Mrs. M. C. Hinkley, 601 Mississippi St., Indianapolis, Ind., says: Have been a sufferer from the pain and annoyance of Piles for fifteen years, the Pyramid Pile Cure and Pyramid Pills gave me immediate relief and in a short time a complete cure.

## COMMON SENSE CURE.

Pyramid Pile Cure Cures Piles Permanently by Curing the Cause.

Remarkable Remedy Which is Bringing Comfort to Thousands of Sufferers.

Probably half the people who see this article suffer from piles. It is one of the commonest diseases and one of the most obstinate. People have it for years and just because it is not immediately fatal they neglect it. Carelessness causes no end of suffering. Carelessness about so simple a thing as piles has often caused death. Hemorrhages occur from no apparent cause and loss of blood causes death. Hemorrhages occur during surgical treatment, often causing death.

Piles are simple in the beginning and easily cured. They can be cured even in the worst stages, without pain or loss of blood, quickly, surely and completely. There is only one remedy that will do it—Pyramid Pile Cure.

It allays the inflammation immediately, heals the irritated surface and with continued treatment reduces the swelling and puts the membranes into good, sound, healthy condition. The cure is thorough and permanent.

Here are some voluntary and unsolicited testimonials that we have lately received:

Mrs. M. C. Hinkley, 601 Mississippi St., Indianapolis, Ind., says: Have been a sufferer from the pain and annoyance of Piles for fifteen years, the Pyramid Pile Cure and Pyramid Pills gave me immediate relief and in a short time a complete cure.

## MAYOR IS BEATEN BY THE MARSHAL

TRIUMPH TAKES THE FORM OF  
A JUDGEMENT.

City of Jefferson Must Pay Chief Pfaller for His Services in Maintaining Order—Divorce in the Brown Case—Inman & Ballard Affairs Closed.

Frank Pfaller city marshal, of Jefferson, won a victory in Judge Bennett's court this morning against Mayor W. W. Reed. The trouble was over a month's pay that Pfaller claimed from the city of Jefferson and which Reed as mayor refused to give on the ground that he did not appoint Pfaller as marshal.

Some time ago Mayor Reed made up his mind that a new city marshal was needed and ordered Marshal Pfaller to surrender his star.

New Man Not Confirmed.

The mayor then appointed a new marshal but the city council did not confirm. Consequently Marshal Pfaller continued to serve the city.

At the end of the month he sent in his bill to the city council and it was approved and sent to Mayor Reed for his signature. The mayor refused to sign it claiming that Pfaller had served the city without orders and must look elsewhere for his pay. The law suit today was the result.

Inman & Ballard Account Filed.

The final accounts filed by Assignee O. F. Nowlan of the Inman & Ballard failure were allowed as filed, which disposes of the case.

Schaller & McKee received judgment against H. B. Walker for \$91.64, and \$19.54 costs.

John S. Brown, of Green county, received judgment in the circuit court this morning, against H. A. Montgomery, for \$3,631.50 damages, \$50 attorney fees, and costs to be taxed.

In the case of John O. Johnson vs. Elick Johnson, the court ordered that Thomas Luckinger be appointed referee to take testimony and report the same.

A Debate Over a Horse.

A \$40 horse was the object of argument in a replevin case before Justice Richardson's court this morning. William Harvey and G. M. Ward were the parties. The plaintiff in the case is a well known farmer in the town of Magallowa, while the defendant is the constable at Orford who while in his official capacity levied on Mr. Harvey's favorite black trotter to satisfy a chattel mortgage. Fred C. Burpee represented the plaintiff, while Attorney J. J. Cunningham appeared in the interest of the defendant.

Divorce in the Brown Case.

James T. Brown was today granted a divorce from his wife, Bertha Brown. The action has been pending for some time. Attorney L. F. Pattee appeared for the plaintiff.

## ROCK COUNTY MINER TELLS OF KLONDIKE

SENDS NUGGETS HOME TO EVANSVILLE FRIENDS.

Bert Farman Has Been Cutting 200 Cords of Firewood, in Hopes That He Will Be Able to Make This Last Him Through the Coming Winter.

Another Rock county man writes home concerning the Klondike region. The following letter has been received from Bert Farman of Evansville, who is now at Dawson City, N. W. T.:

"I received three letters a few days ago. One from Fannie dated March 22, one of March 11 from Blanche, and one of March 11 from Bulah which I think very good. I think you must have received a letter from me which I mailed February 1, but you did not speak of it, so hope you will write as soon as you get this.

"I am prospecting on the ground I spoke about, leasing to work, but have not got a hole down yet as it is very slow work in summer, but I expect to finish in about a week and if I get a prospect I shall cut wood until fall. I think 200 cords will work the ground out if I can get men to work this winter. I presume you wonder how it is

done, and so I will try and explain it.

It is about 17 feet to bed rock, eight feet of which is soil, the balance gravel and all frozen winter and summer. We sink to bed rock, then burn the gravel at night, take it out the next day with bucket and winchless and pile it out on top. Then in the spring when it thaws we wash it in sluice boxes to separate the gold. I couldn't explain what a sluice box is. I would like very much to see you all that is sure, but think this my chance to make some money and then see you. But if I don't make it this time, I will never try again—at least mining. The man 400 feet below me took out \$40,000 from 60 feet of ground and it only cost 10 percent to put it into the sacks, so I feel pretty good at present. You wonder what I have to eat. I haven't had much to be sure, but it makes little difference as long as the prospects are good.

We eat mostly beans, bacon, flour and dried fruits and sometimes meat, but there are so many here now that it is hard to get and costs 50 cents a pound when you do get it. Flour has sold as high as \$80 a sack this winter. It was brought from Circle City with dog teams—about 250 miles. I did not intend to write until I got through prospecting but the party I sent it with is going sooner than expected and I was afraid I would not have another chance.

"With this I send some nuggets for Bulah a chain, some for a watch chain for pa, one for a pin for Will; also in the package you will find a piece of quartz for charm and dust besides to pay for putting together. Altogether I think there is about \$55. You may have to send to Mason City as there may not be a silversmith at Belmont.

"I happen to think of a \$2.00 piece I found in a hole I sank last spring, so will send it to Earl. Wish I could send you all some; but wait until I make my stake. BERT FARMAN.

## QUAKER CITY ECONOMY.

**Watchmen and Guides Disgusted—Lose Their Brass Buttons.**

There couldn't possibly be in all this city another crowd of men so disgusted as were the watchmen, guides and elevator men at the city hall, says the Philadelphia Record. It was all because the public buildings commissioners had been seized with what the men considered a ridiculous attack of economy. This is the time of the year when all uniformed men in the employ of the city prepare to change their winter clothing for their summer garments. Now, the uniforms worn by the city hall men are profusely adorned with brass buttons bearing the seal of the city and the municipal authorities are particularly careful to see that none of these buttons shall ever go astray. It is, in fact, a punishable offense for a common citizen to have in his possession one of these buttons. Accordingly when each man appeared for duty he was called to the front and an official, armed with a pair of shears, snipped off all the city's buttons from the victim's uniform except one, which was left to hold the coat across the chest. Fortunately the suspender buttons on the trousers are just the ordinary kind, without any municipal insignia, otherwise there would certainly have been a strike. The crop of buttons thus gathered in was sent to the tailor, who had finished the summer uniforms up to the point of attaching those necessary little articles.

## INDIA SHAWLS.

**Very Good Imitations Are Made in France.**

Since the introduction of the Tibet goat into France the cashmere shawl has been imitated with such wonderful exactness that it is hard to detect the imitation from the original, says the Chautauquan. Experts say, however, that the genuine India shawl can be detected from its having a less evenly woven web and also from its brighter colors. It is likewise said that the border of the real India cashmere shawl is invariably woven in small pieces, which are sewed together and the whole border is afterward sewed onto the center. It is a mistake to think that the shawls are manufactured in India in the form in which they are sold here. Generally the borders and centers come out separately and are put together in sizes and often in patterns to suit the customers. A number of shawls sold as "real India" are actually manufactured in France. Persons familiar with both articles say that the original is softer than the imitation and that this softness arises from the way the thread is spun and partly also because the Tibet goat deteriorates when removed from its native hills.

## A Harvard Lottery.

As late as 1806 Harvard College was raising money by a lottery. It offered 20,000 tickets for sale at \$5 each, with prizes ranging from \$15,000 down to \$7. "In the above scheme," said the prospectus, "the just expectations of the public and the interest of the University have been consulted. It is worthy the attention of adventurers that the highest prize is nearly double in value to any that has been drawn in this commonwealth for many years past, though the usual price of tickets is preserved. The managers solicit the patronage of the public in general, and of the friends of Literature and the University in particular, and, considering the object of the Lottery, they will combine the prospect of gain with the certainty of benefitting the University, and by lending their aid to the means of education will promote the best interests of their country."—New York Tribune.

## The Water Bear.

One of the commonest curiosities revealed by the microscope in water is a little animal that looks like a bear. An extraordinary thing about this tiny creature is that he is found in the gutters of houses, where he is at one time dry as dust and scorched by the blazing sun, at another active and full of life under a refreshing shower of rain.

The water bear has the scientific name of tardigrada, because he takes life so easily. He is always fat and plump, and spends his waking periods in constantly grubbing with his four pairs of legs among whatever rubbish comes in his way. Having eyes, brain and a nervous system, he is much ahead of most of his tribe, and he is altogether one of the most interesting and amusing little animals known to science.

## A Useful Article.

"It's very absurd for men to make fun of the fashions which women adopt," said Miss Cayenne, "when their own attire is so unreasonable."

"It seems to me," replied Willie Washington, "that men dress very sensibly."

"But look at the absurdly high collars they wear!"

"Don't you know what they are for?"

"No."

"They're for us to rest our chins on so that we won't get so tired looking over the hats in the theater."—Washington Star.

## TWO TYPES OF THE SOUTH.

**Early Settlers from England Leave Their Traces to This Day.**

The two leading types of southern population are plainly the Virginian and the South Carolinian of the tide-water. For this fact there are both historical and physiographic reasons, declares the Atlantic. Virginia was the first and South Carolina the second southern colony to be settled by well-to-do Englishmen who desired to found permanent homes. The introduction of slavery and its application to staple crops speedily gave an aristocratic tone to society in both provinces, but between them, in North Carolina, and to the south of them, in Georgia, there were fewer wealthy settlers and no staple crops to speak of, so that from the first society in these provinces was more or less democratic in spite of slavery. Before, however, the gentry of the coast could expand and occupy the country lying between the Blue Ridge and the Alleghenies, and beyond the latter range of mountains a very different sort of people had moved in and taken possession. Among these people, owing to their habits and the nature of their soil, slavery could take no strong hold; hence they remained democratic and distinct from their tidewater neighbors, as indeed they are to this day.

## AS TO CATS.

Dixie Norton of 4011 Drexel boulevard, Chicago, is the only cat in the world that rides a bicycle.

He is the sensation of cyclists as Mrs. Leland Norton spins down the boulevard with her pet. He stands erect in a fanciful Indian basket that hangs from the handle bar and watches the sights with all the eagerness of a happy child at a carnival.

"How did Dixie learn to ride? Why," said Mrs. Norton, "he was always crazy to go out, and one evening last summer I picked up his basket and held him at arm's length while I rode around the block. After that he used to perch on my shoulder, but as his avoirdupois increased I was obliged to swing him from the handle bar."

The query, "Dixie, darling, do you want to go to ride?" is sufficient to send Dixie bounding with delighted squeals headforemost into his basket, where he wriggles and twists until "heads are up," when he sets up a piteous howl. When taken from the wheel his vocalization is something terrific, and he frantically clutches and claws everything in reach. Mrs. Norton believes he is equal to a hundred-mile run, and some day a gold century may rest on the snow-white breast of Dixie Norton.

Dixie is a physical freak, which doubtless accounts for his athletic proclivities, for he is a short-haired Angora, though bred from Joe, the famous Persian. His mother was scarcely less aristocratic, and Dixie is the only short-haired member of that distinguished long haired family of which Echo (Dixie's brother) is the most noted among cat fanciers.

Ripple and Royal are Dixie's sole descendants. They are magnificent cats; their coats are as long as a fashionable dude's, and their tails like the plumed grass in a southern swamp. But these pussies nearly lost their lives through the selfishness of their maternal parent, for high-bred cats, like some society dames, do not make good mothers.

Dixie's mate deserted her two beautiful kittens when they were a few days old, but Mrs. Norton was equal to the emergency and rigged up an incubator to keep the little creatures warm.

Their diet was a matter of serious consideration, for the commercial value of an Angora cat exceeds the annual income of a hard working clerk. "Blood," reasoned Mrs. Norton, "is their natural food, and wine is a stimulant." So, with the aid of a medicine dropper, she fed the kittens for weeks with a decoction made of four tablespoonfuls of blood to one of wine. Later they graduated into raw smelts scraped fine. Veterinary surgeons affirm that Mrs. Norton has discovered a perfect diet for Angoras who have the misfortune to be orphans.

Dixie is a beautiful animal; his hair is fine and white as the snow that drifts on an Alpine hill, ears like twin sea shells and the heart of a rose is no pinker than his little nose. His eyes are as brilliant as emeralds, and he is as clever as a trick dog—shakes hands, stands on his hind legs, jumps through a hoop—in fact, there is no limit to his accomplishments. Mrs. Norton has fitted up a perfect little cat hospital, where the invalids receive the most scientific treatment. She has six white Angora cats, and it is a most fascinating sight to see the procession caper through the big drawing rooms. They are like a swirl of snow driven by a cyclone, but their maddest frolic is checked by a word, and they settle down like white patches of hoar frost.

In all the country there is no private collection of Angoras like Toots and Ponney, Ripple and Royal, Madge and Dixie Norton, and the king of them all is Dixie, the only cat in the world who has the nerve to ride a bicycle.

## A Burst of Generosity.

"I hear," said the crusty old gentleman, "that there are some violins so valuable that nobody thinks of playing on them." "Yes, I saw one in a museum," replied his wife, "I wonder if I couldn't buy one and trade it to the young man next door for the fiddle that he has been using for the last six months."—Washington Star.

## HORSE TRADERS' TRICK.

**Kansas City Dealer Learns Something New in St. Louis.**

"I have been trading in the big horse markets, like the one here in St. Louis, a good many years, and it was only a few days ago that I found out that the country horse trader can give the city chap cards and spades and then beat him at his own game," said Frank Pomeroy, of Kansas City at the Lindell. "Your innocent farmer is not half so innocent as he looks or pretends. This conclusion was forced on me while I was attending a sale of horses on County Court day at one of the best-known county seat towns in Mississippi. I had gone there for the purpose of buying a number of horses of certain quality for a customer in St. Louis. I wanted good-looking, gentle stock between the ages of three and six years, broken to both saddle and harness.

"Twenty or more animals that met the requirements of age and looks were trotted out before me, but none of them did I buy because invariably when I expressed my satisfaction with one something happened to make me displeased with him. In each case I was assured by the owner when the animal was first brought out for inspection that he was gentle and easily managed, but when I applied the test I found that just the contrary was true. When the horses that pleased my fancy were started out for a canter in order that I might see their gait and style they would begin to rear and pitch madly and try to throw their riders. I thought, of course, that the 'honest farmer' had tried to deceive me and congratulated myself on having caught him at his trick. The owners appeared to be as badly surprised by the unexpected antics of the animals as I was, but I, of course, thought this was only a part of their little game. Several of them protested earnestly to me that they could not understand why their offerings were behaving so badly, as at home they were so docile and tractable that a child could ride or drive them anywhere.

"I came back to St. Louis from that sale empty-handed. Not until yesterday did I learn the trick that had been practiced on me to beat me out of my purchases. I met at the sales stables across the river one of the country horse traders I had met at the county seat sale. He laughed when he saw me and coolly told of how he had put up a job on me when I was in his town. He explained that the horses I first selected and then refused to buy were in reality as gentle as their owners had represented them to be but that he and his partner had discovered a chemical liquid which when poured on any part of a horse's anatomy covered with hair in a few seconds after its application soaks into the hide through the hair pores and causes such intense pain as would make the gentlest horse pitch and rear like a wild pony when first saddled. These rascals found out that there was a demand for the horses I had selected and concluded to beat me out of them so they could buy them at a lower figure than I had offered. They sneaked around when the owners were not looking and dropped this liquid on each of my selections just in time for the fluid to take effect on the animal at a critical time. I threw up my hands when this explanation was made and took off my hat to the man who made it."—St. Louis Republic.

## REMEDIES FOR SEA-SICKNESS.

There is no doubt that many people who would otherwise spend their holidays in visiting foreign countries are deterred by the fear of sea sickness, an effective remedy for which does not yet appear to have been invented. Although various means of relief have obtained a degree of credit in this distressing and severe affection of the stomach, still the greatest relief is usually to be gained by remaining perfectly quiet and motionless, and by exposing the body to the fresh air on deck instead of retiring to the cabin.

A little wine or spirit diluted with water will frequently succeed in checking the vomiting and nausea, and the same effect has been known to arise from eating two or three fresh apples, while any very strong impression made on the mind by exciting a powerful influence on the brain is at once capable of arresting the progress of sea sickness, such, for instance, as an alarm of fire or other risk to which the vessel may be suddenly exposed. It may not be generally known that deaf mutes never suffer from sea sickness, a fact which is perfectly well understood by those who have had charge of these unfortunate.

The result of inquiries that have been made into the reason of this immunity tends to show that the absence of sensibility in the auditory nerves is the occasion of the entire freedom of deaf mutes from sea sickness. Both physiological experiment and pathological observation point to that part of the inner ear known as the semi-circular canals as exercising a controlling influence over the maintenance of the erect posture and the sense of equilibrium. As those functions are frequently disturbed on shipboard by the rapidly changing motion of the ship, it seems probable that this has much to do with sea sickness, if it is not the sole cause of it.

## Something Wrong.

Mrs. Stapleton—What do you suppose is the matter with the Bubblethwaites? They must be mad at us for some reason. Have you ever done anything to offend them? Mr. Stapleton—No. Why do you think they are mad? Mrs. Stapleton—They haven't send over to borrow our lawn mower yet this year.—Cleveland Leader.

## CHINESE OBSTACLES.

**Evil Spirits Which Must Be Driven Out.**

If a house is to be repaired wonderful forethought is necessary. The evil spirits which are supposed to occupy each dwelling that mortals have inhabited cause the carpenter no end of trouble and no trifling expense, says Lippincott's. First, an astrologer must be consulted with regard to the most lucky day for beginning the work; then a square suspended from the ridge beam is a notification to the spirits of darkness that their dwelling-place is to be disturbed, wherefore the square thing for them to do is to move out quietly and peacefully. Next the carpenters make offerings to these unseen residents. These gifts seem to say: "If you please, spirits of darkness, accept this bribe and speedily take your flight."

Next the neighbors must be warned that these evil influences are about to be turned loose, perhaps to seek shelter under a neighboring roof. Every house on that street receives a notice that upon a certain day and hour repairs are to begin on the dwelling of Ah Sin. Each household can then pay the imps not to enter their doorway but to go to the next neighbor.

Even the farmer cannot begin his work in spring until after the national festivals are celebrated in honor of the special gods who are supposed to make it their particular business to look after the welfare of those who till the soil. In a land where more than 100,000,000 people are supported by agriculture, where many farms have been in cultivation for three or even four millenniums, we naturally expect to find skill in that line of work. In this we are not disappointed, for Chinese farming is scientific handwork.

## RINGING AND RUNNING.

**A Pastime That Seems to Be Disappearing from the Sports of Youth.**

"In the days when knockers graced the house door," said Mr. Stoggleton, "the small boy found sport in banging the knocker and running. When bells came in he yanked on the bell pull and then fled. Nowadays he mysteriously presses the button; but the sport of calling people to the door for nothing is not what it was; and it seems probable that with the general introduction of the push button, it will finally fall into decadence. There was some fun in pounding with the door-knocker, whose thunder reverberated through the hall and filled the house, all of which you could hear yourself. And you could yank the bell pull out to the limit, causing the bell to fly almost out of the spring; there was fun in this. But there is no such fun in pushing in a push button. You can press that in perhaps a quarter of an inch, and that is all you can do with it. Say you are in the vestibule of a flat. Very likely you don't hear the bell ring at all; it may be that it is up three or four flights of stairs; you hear no sound. Nobody comes to the door; you don't have to run. Possibly the people whose bell you have rung may press a button up there in the air somewhere and you may hear the click of the door-opener at your side, or they may not do even that. It is dry fun; not like the old slambang knocker on the jingle bell right in the hall."

## HUMAN BLOOD TURNED TO WATER

**Remarkable Affliction of Miss Roselle Darr, of Cumberland, Md.**

*From the Courier, Cumberland, Md.*

The reporter of *The Courier* hearing of a terrible malady with which a young and handsome lady of Cumberland, Md., was afflicted, called at the residence of Mr. Michael Darr, 58 Frederick street, to learn something of it.

Mrs. Darr said that her daughter Roselle, aged 20 years, had been afflicted with a disease that apparently had turned her blood to water, accompanied by nervous prostration, pains, loss of appetite, etc., making life a burden.

The family physician was consulted, but his treatment brought no relief, and her daughter's existence was a dragging misery. The mother also said that her daughter accidentally cut her finger rather severely, and they were astounded to notice that no blood came from the wound. "Then," said the mother, "I was convinced that my daughter's blood had really turned to water."

Mrs. Darr, continuing, said she had read of the merits of Dr. Williams' Pink Pills for Pale People, and had little faith in such remedies, but finally purchased a box at Mr. Hervey Laney's drug store, on North Centre street.

After her daughter, Roselle, had taken one box a slight improvement was noticed in her condition; the remedy was continued, and after three and a half boxes were taken her daughter's health was restored.

The reporter naturally had a desire to see the young lady after hearing these remarkable statements, but was informed that she was out of the city on a visit.

Mr. Michael Darr, the father of the young lady, is a passenger engineer on the B. and O. railroad, and is an experienced and popular railroad man.

To those who may doubt the accuracy of this statement, we refer them to Mr. Darr, who will indorse all we have said, and to the following affidavit of the mother of the young lady:

I, Mrs. Rebecca Darr, do acknowledge the statements of the above article relating to my daughter's illness, and the merits of "Dr. Williams' Pink Pills for Pale People," in connection with the same, is substantially correct.

## RESOURCEFUL AT LUNCHESES.

The Culinary Triumphs of One New York Woman.

There is an excellent lady uptown in whose family boards a young man of domestic tastes and unassailable appetite, says the New York Mail and Express. She puts up a lunch for him every day, and he carries it with him to his business. In so far this story does not differ in anywise from the experience of thousands of other young men who board in excellent families and carry their lunches. But this young man claims that for an infinite variety of luncheons that custom cannot stale his landlady has the call.

Now, a luncheon, in the parlance of the life of him who boards, is a sandwich, or several of them. It takes considerable art to conceal the fact that he is eating something that he had yesterday and expects to get again tomorrow. To vary the ration takes all the resources of the commissary of subsistence, but it can be done. The young man in question has kept a journal or commonplace book, in which he jots down, among other things, what he had to eat each day. From these items he has made a partial list of sandwiches, including those which had the following ingredients: Fig paste, fried egg, grape butter, roast goose, honey, Hoboken rabbit, gooseberry, chicken, jelly, roast beef, lemon marmalade, wienerwurst, sugar, ham, tongue, turkey, sausage, deviled ham and caviare.

It is always a moment of suspense with him when he sits down before his lunch, for he knows not what pleasant surprise it may have in store for him. Just now he is taking a course of preserved ginger sandwiches with the best of results. The daily meal has its entrees of pie, pudding or fruit, but it is the composition of the material lying between the two lids of the sandwich that most concerns him who discusses it.

## ANOTHER CHINESE RIVER OPEN

The West River, in Southern China, with Two Ports, to Be Opened in June.

Arrangements are making for the opening of the West River, in the south of China, to trade in June. The river is being surveyed and the channel suitable for steamers buoyed. Two ports on the river are to be opened to residences and trade—Wuchow and Samshin—while at three other places coaling stations for steamers will be established. At the two ports mentioned land for foreign settlements has been purchased by the Chinese government, and already two steamers suitable for the navigation of the river have been built in Hong Kong, and are engaged in local trade in readiness to ascend the river as soon as it is declared open. What the effect of the opening of this great stream to foreign trade may be is at present a matter of speculation; but as a great trade by junks already exists along it, and as the river traverses for 600 miles a channel navigable for large steamers in a populous and fertile region, it would seem that there is a great opening for trade by its means. Hong Kong mainly will profit by the enterprise, and as the Hong Kong merchants have persistently agitated the matter for more than thirty years, they are fairly entitled both to credit and profit from it.

## Max Maretzek.

Newspaper men go into curious places, and are forever running across curious people in them. The last place I met dear old Max Maretzek was a hole in the wall in West Twenty-seventh street, called, by courtesy, a French restaurant. We named it "Little Del's." One of Balzac's fat concierges was the head of the establishment, and it was possible to obtain an excellent dinner there for twenty or twenty-five cents. Max enjoyed his repast, and appeared pleased with the company that surrounded him, though it was composed of singers, actors and artists with more genius than money.

## Not Worth the Effort.

From the San Francisco Argonaut. The late Senator Voorhees was not dissipated—but a story is told of him that he was once walking to the capitol building at Washington with a friend. As they were passing about the last saloon before reaching the building the friend said, "Senator, let's go in here and take one drink." Voorhees turned on him with a look half jocular and half of disgust, and said, "No, sir; what is one drink to me?"

## Spotted His Health.

The minister was a great hand-shaker—shutting down like a vise. One day he took a boy's hand and gave it an awful squeeze, as he said: "My little fellow, I hope you are pretty well today."

With tears in his eyes the boy answered: "I was till you shook hands with me."—Tit-Bits.

## ORANGES WITH HORNS.

Some Strange Varieties of the Fruit Grown by the Chinese.

The Chinese are very fond of monstrous forms of fruit and flowers, and any departure from the normal form is usually cherished and highly valued. In their gardens they have numerous forms of monstrous oranges—some will produce fruit with points like fingers, and are known as the Hand Orange. Another form, says Meehan's Monthly, has a long horn projecting from the apex, and they are known as the Horn Orange. Another variety, which botanists have known by the name of Citrus aurantium distortum, bears a fruit in the resemblance of a cluster of sea shells. To one ignorant of the laws of vegetable morphology, these spells of wandering from the normal type are very mysterious, but when it is understood that all parts of the orange, as well as other fruits, are made up of what would have been leaves or branches changed so as to constitute the various parts of the seed and seed vessels, and that a very little difference in the degree of life energy will change them into various different parts that come to make up the fruit, the mystery in a great measure is solved. There are few branches of botany which give the lover of fruits and flowers so much pleasure as the study of morphology.

## Good Printing...

Is like good painting—it demands and obtains a second glance. The second glance leads to thought about and knowledge of the thing portrayed, and then on to the artist or advertiser.

The kind of printing as well as the kind of painting that it pays to do and to have done is that which obtains this "second glance." Plenty of the other kind!

We are PRINTERS. Our work obtains glances of admiration, and thus leads on to the end desired. We don't do the "other kind." Put our job room to the test.

## A Conflict Of Evidence...

This is another remarkable story from the pen of Rodrigues Ottolengui, who wrote "An Artist in Crime," conceded to be the strongest detective tale that has appeared in years. "A Conflict of Evidence" will add to the reputation of Mr. Ottolengui and will fascinate all who have the opportunity to read it. We have provided for the readers of this paper by purchasing the serial rights. The first chapters will soon be printed.
